Policy improvement in Tuscany

Our policy instrument and how we will improve it :

- The purpose of regional action plan for Tuscany is to improve monitoring systems and funding, to contribute to the potential of energy efficiency in public buildings .
- Action 1: improve a new monitoring system for buildings owned by the Tuscany Region.
- Action 2: Develop the Smart Control Room of the Firenze metropolitan area in a more integrated system: The New Florence Smart City Control Room will improve the existing CR bringing together in a single place the monitoring functions of the metropolitan area.

5 Key points to describe our learning plan

What we want to learn? 5 key points...

1. Best technologies about monitoring
2. Best funding about monitoring
3. Better investment experiences that have paid off thanks to better efficiency
4. Better regional monitoring experiences
5. The best experiences of laws, regulations and political strategies to support monitoring
